

Ready Wireless Partners with Peerless Network for Bundled Voice and Messaging over WiFi

Partnership increases network and cost efficiencies while improving customer experience where cellular service is limited

November 18, 2015 07:00 AM Eastern Standard Time

CHICAGO--([BUSINESS WIRE](#))--Ready Wireless (www.readywireless.com) announces a partnership with Peerless Network to provide MVNOs (Mobile Virtual Network Operator) with a complete solution offering all aspects of voice and messaging over WiFi.

Service providers continue to be challenged to provide competitive offerings to its customers with voice, messaging and data services where traditional cellular service was limited or unavailable. Not to mention the significant cost and time savings to providers looking to build their own voice and messaging over data and WiFi solution.

Peerless Network partners with providers like Ready Wireless and MVNOs with a complete solution offering all aspects of voice and messaging over WiFi.

“Securing a partnership with a company like Peerless Network to provide Voice and Messaging over WiFi capabilities, who has direct relationships with carriers throughout the country, allows us the peace of mind to know that we are receiving a quality voice solution. This, coupled with the significant cost and network savings, are benefits that we feel will enhance our already popular MVNO Engine™,” said Fred Haumesser, Executive Vice President and Co-Founder of Ready Wireless.

Peerless Network is a leader in the wholesale wireless space providing a complete bundled voice and messaging over WiFi service including all aspects such as application, phone numbers, and underlying cellular network to MVNOs and other service providers.

“We are excited to partner with Ready Wireless and other MVNOS and service providers allowing them to take advantage of WiFi for their voice and messaging needs. This solution allows them to help reduce their overall cost structure and adds additional voice coverage in hard to reach cellular areas,” said Heather McNeive, Vice President of Wireless Solutions at Peerless Network.

About Peerless Network

Peerless Network simplifies how networks, devices, and people connect. Peerless Network has helped hundreds of carrier and service providers via innovative interconnection services. In 2015, Peerless Network launched a wireless service including a holistic solution designed for MVNOs looking to incorporate all aspects of voice and messaging over

WiFi. Headquartered in Chicago, IL. For more information please visit www.peerlessnetwork.com.
