

ANImate

ANImate is Peerless Network's automated self-service telephone number provisioning portal and API to support real-time telephone number management that can be customized for enterprise customers at their fingertips. With ANImate, users are able to order through Peerless' vast inventory of available telephone numbers, including toll-free numbers, to maintain a local presence anywhere. Users are also able to provision Caller ID Delivery and Storage, E911, Messaging and more!

Instant Searches / Simple Ordering

- Enterprises are able to search Peerless Network's extensive inventory of phone numbers via any combination of state, LATA, rate center, location, NPA and/or NXX
- Easily place and track telephone number orders for multiple locations

Automatic Activations

- Real-time activation of numbers, instantly verified via LERG attributes
- API bonding available and easily integrated for multiple locations
- Users can initiate port-in requests and receive direct feedback, information and order status from the Peerless Local Number Portability (LNP) team

Customize Admin Access

- Set individual user permissions to view/edit user orders, implement features and process specific order types
- Multiple user accounts available

Self-Service Administration

- Real-time number management at your fingertips for multiple locations
- Easily manage, move, add, change and disconnect activities at your convenience
- Avoid time and hassle on the phone placing orders and managing your services with sales reps
- No contracts, customizable monthly inventory and plan
- Robust reporting capabilities
