

## Peerless Portal Enterprise

The Peerless Portal by Peerless Network is a fully automated online self-provisioning portal for enterprise customers to easily purchase and manage SIP trunking channels, telephone numbers, local and domestic/international long distance, toll-free services and call termination for multiple locations from one advanced system.

All products and services can be provisioned directly on customers' premises and via mobile devices. The Peerless Portal provides high-voice quality services by utilizing Peerless Network's owned and operated redundant and reliable backbone network.

### Simplicity

- A full suite of telecommunications services at multiple locations at your fingertips
- Easily order telephone numbers (local, long distance, international, toll-free) and SIP trunking channels for multiple locations
- Simple and swift account set up via email invitation
- Avoid time and hassle spent on the phone placing orders and managing your services with easy to reach sales reps
- Easy to use tips and guidelines available within the platform

### Real-time visibility

- Full visibility to real-time stats, resulting in increased time-to-revenue speed
- API bond available for seamless integration with other APIs
- Mobile friendly resolution to access wherever and whenever needed
- Real-time billing allows customers to check MOU (minutes of use), active calls, monthly calls connected, call delivery record with exportable capabilities

### Autonomy

- Easily manage telephone numbers, services, routing, configuration and inventory for multiple locations via one system
- Initiate trouble/service requests via the automated portal to be received by a NOC queue specifically for enterprise customers

- No contracts, no commitments, no subscription fees
- Order and cancel services based on your business needs without penalty
- Flexible and customizable billing: ACH payment, pre-pay, post-pay
