

Cloud PBX

Peerless Network now offers Cloud PBX services for enterprises to set up and manage a telephone system over a cloud-based IP network. The Peerless Cloud PBX enables enterprises to access PBX capabilities without the need for complicated and expensive equipment. This network runs on Peerless' own reliable network infrastructure and technologies, offsetting third-party costs and providing the most competitive market rates in the industry.

Simplicity

- Zero touch provisioning
- Provisioning is simplified via the Peerless Portal, the company's automated provisioning platform
- Easily customizable for business operations big or small
- Complete control and integration via Peerless' API driven, self-service portal for real-time number management
- Vast inventory of nationwide DIDs
- Subscriber self-care portal
- Fax-to-email

Quality and Reliability

- High-voice quality
- Low latency
- Utilize Peerless Network's owned and operated redundant and reliable backbone network
- Full suite of PBX features including voicemail to email, call forwarding, IVR/Digital receptionist, ring groups & call queues

Cost-Efficiency

- Peerless leverages its own network infrastructure and proprietary technologies to avoid additional third-party costs
- Access PBX capabilities without complicated and expensive equipment
- Most affordable industry rates
- **No Term....No Commitments**

Autonomy

- Easily manage telephone numbers, services, routing, configuration and inventory via one system
- Full visibility to real-time stats, resulting in increased time-to-revenue speed
- Superior customer service and support

Work from Home with Cloud PBX

- Simply access Cloud PBX via the Cloud Dial Mobile App or the Cloud Dial Desktop App
- Employees are able to make and receive calls and texts with an extension phone number anywhere in the world from their smartphone or computer
- Receive pre-provisioned phones and begin working from home instantly
