

Peerless Network A2P Enterprise Messaging Solution (A2P)

Peerless network offers a competitive Application to Person (A2P) messaging solution, which provides end-to-end SMS/MMS one-way and two-way messaging support for long-codes and toll-free numbers for enterprise customers. Peerless customers can receive this additional service in one platform, without relying on A2P messaging services from third-party providers.

The Peerless Network A2P Messaging Solution

High-Quality, Low-Cost Messaging

- Peerless A2P Messaging offers SMS/MMS messaging support for long-codes and toll-free numbers
- Superior quality at competitive, market-driven rates
- Two-way interactive conversations, marketing campaigns, transactional alerts, One-Time-Password and Multi-Factor-Authentication, Opt-in/Opt-out Management and message broadcasting
- Supports any A2P enterprise SMS/MMS messaging needs with value-added solutions to support future requirements
- A2P is billed for inbound and outbound

Messaging in Minutes – Near Real-Time Implementation

- Near real-time implementation of Peerless Network's A2P messaging services
- Access A2P messaging services from one convenient platform, eliminating the hassle of third party providers

Direct Control, Better Control

- Direct integration with the Peerless A2P Messaging Platform means quicker and more efficient trouble-shooting when needed
- Full integration with Peerless ANImate or API for number provisioning
- SMPP, MM7 protocols or Rest API for dual integration
- Access a team of Peerless experts to assist in setting up and managing existing messaging campaigns, while also ready and able to help launch and initiate new campaigns

Global Service Footprint

- Full messaging capabilities available across the U.S., Canada and the U.K.
- International message termination within all Peerless international destinations
