

Peerless Network Products and Solutions for Channel Partners

Peerless Network is committed to supporting our channel partners with the tools and infrastructure to ensure that your business and your customers' business run smoothly. With best-in-class cloud communications products and services, boost your business with a company that can get you there.

Channel Partner Benefits

- Best-in-market agent commissions.
- Highest quality of service via Peerless' owned and operated local and national network, including:
 - Direct connections to almost all VoIP, Mobile, Cable, Long Distance and International service providers.
- Over a decade of providing cutting edge tools and products to the marketplace.
- Quick and easy implementation, generating commissions sooner.
- Easy access to dedicated Peerless team for strategy and unrivaled support.
- Greater visibility with real-time customer stats.
- Newly ordered services are added directly back to the respective agents' accounts

Peerless Portal for Channel Partners

Provision your customers from anywhere

- ◆ A fully automated, online self-provisioning portal for channel partner agents and their customers to easily purchase and manage SIP trunking channels, telephone numbers, local and domestic/international long distance, toll-free services and call termination from one advanced system.

Maximize Commissions with Peerless Maximizer

Control your commissions

- ◆ The Peerless Maximizer is a portal that facilitates channel partners to set and calculate their own pricing and percentage markups to maximize commissions.
- ◆ Agents can **earn 50%+ residual commission** on every SIP Trunking and UCaaS deal with Peerless Network

SIP Trunking

Peerless Network eliminates the days and hassle of trying to transition your traditional phone systems into the cloud. Our advanced account management tools (The Peerless Portal) enable you to scale your business and easily make the switch to SIP trunking.

With the Peerless Portal, you receive a fully automated online self-provisioning portal to easily purchase and manage SIP trunking channels onsite and via mobile devices.

Peerless Direct Routing for MS Teams

Peerless Direct Routing for Microsoft Teams is a seamless and native connection between Peerless Network's SIP trunks to Microsoft Teams, which turns MS Teams into an office phone system with PBX integration capabilities. This enables global organizations and work-from-home settings to simply and affordably scale leveraging an MS environment.

Cloud PBX (UCaaS)

Peerless Network Cloud PBX provides seamless, secure, and instant collaboration with employees and customers with our cost-effective and simple-to-deploy business phone solution.

With the Peerless Network Cloud PBX, enjoy the flexibility of extension dialing for your team anywhere in the world.

White Label Cloud PBX (UCaaS)

The Peerless Network UCaaS private label selling program is designed for enhanced service providers to manage their business from quote to compensation via the fully automated **Peerless Portal**, to easily support the urgent need of an increasingly decentralized workforce.
