

## Peerless Direct Routing for Microsoft Teams

Peerless Direct Routing for Microsoft Teams is a seamless and native connection between Peerless Network's SIP trunks to Microsoft Teams, which turns MS Teams into an office phone system with PBX integration capabilities.

This enables global organizations and work-from-home settings to simply and affordably scale leveraging MS Teams.

### Within MS Teams

- Make and receive business calls
- Engage in conference calls
- Transfer calls
- Voicemail
- Instant Messaging
- Unlimited File Sharing

### Why Peerless Network vs. Microsoft Direct?

- All features included:
  - Geo Redundancy
- Porting support
- Seamless implementation
- US Based 24/7/365 Tier 1 NOC support

### Benefits of Working with Peerless Network

- Peerless Network owns and operates a Nationwide Voice Network.
- Our Peerless Portal offers fully automated and seamless SIP trunk management.
- Peerless does not require a trunk for every license.
- Peerless provides a complete solution, including the SBC.
- Peerless does not charge for inbound usage.
