

## Enterprise SIP Trunk

Peerless Network eliminates the days and hassle of trying to transition your traditional phone systems into the cloud. Our advanced account management tool (The Peerless Portal) enables you to scale your business and easily make the switch to SIP trunking.

With the Peerless Portal, you receive a fully automated online self-provisioning portal to easily purchase and manage SIP trunking channels onsite and via mobile devices.

### Fast and Flexible

- Fully automated SIP Channeling and Telephone Number ordering.
- Real-time activation of Telephone Numbers and SIP Channels.
- Multisite and remote office connectivity.
- Vast inventory of geographic numbers.
- Full suite of services, including:
  - Static or Registered Trunks
  - Geo-Redundant Routing
  - CNAM Delivery and Storage
  - E911
  - Load Balancing – Distribute traffic through Multiple IP's
  - PRI & Analog Delivery

### Reliable and Secure

- Failsafe Routing ensures you will never miss a call.
- Certification w/ most major systems, including Microsoft Teams, Avaya, Cisco and more.
- SIP Trunks delivered on Peerless Network's owned and operated redundant network.

### Cost-Effective

- Lower your monthly telecommunication bills.
- Highly competitive pricing.

### Total Control

- No additional charge for inbound calls; only pay for the calls you make.
- Real-time visibility of usage and call detail.
- Avoid bottlenecks by adding SIP channels when your business demands it, then decrease channels when things are slower all in real time.
- Autonomy to manage communication needs, services and demand.
