

Peerless Network offers customers an unmatched array of Internet/Data options that may be tailored to meet the specific requirements of your business' network at a cost that makes sense. Our solutions range from Dedicated Internet Access to a wide variety of Broadband options.

All of Peerless Network's services are backed by 24x365 proactive monitoring and supported by our redundant US based Operations Centers to ensure your network delivers an unmatched customer experience.

DEDICATED INTERNET ACCESS (DIA):

Dedicated Internet Access from Peerless is exactly that: a dedicated network facility (exclusively for the customer) that provides access to the Internet. This option is the most reliable solution available and can be customized to meet the customer's specific requirements.

Features:

- Dozens of national and regional last mile providers
- Ethernet On-Net (also referred to as Core) or Resold DIA
- Speeds ranging from 3 Mb to 100 Gb
- Managed or unmanaged
- Wide variety of access media options for Ethernet and Resold
- Performance SLAs

BROADBAND INTERNET:

Broadband Internet from Peerless is a widely available, economical method for providing customers with access to the Internet. Broadband Internet is a resold product that Peerless buys wholesale and offers to customers as a managed service.

Features:

- All major national and regional providers
- 5 Mb to 10 Gb
- Fiber (FTTP), cable/coax, xDSL, and fixed wireless options
- Managed or unmanaged
- Most cost-effective option
- Quick installation

THE PEERLESS PORTAL:

Customers enjoy “real time” access to Peerless’ industry-leading self-care portal, featuring desktop and smartphone apps. Provision additional services, view call-reports, call detail, and trouble ticketing, and manage billing. You’ve never had more control over your telecom!

WHY PEERLESS FOR INTERNET ACCESS/DATA?

- One accountable party
- Leverage over last mile vendors
- Optimal solution for every location
- Diversity designed your solution
