

## POWERED BY CISCO MERAKI

SD-WAN from Peerless Network is powered by Cisco Meraki to optimize your bandwidth and to deliver the applications your users expect. By deploying redundant circuits at any of your locations and allowing Peerless' SD-WAN to analyze your traffic, your organization will benefit from a greater level of control over your network traffic for improved network agility, security, and application performance.

### What's in it for you?

- Improved end-user experience
- Redundancy and traffic flow efficiency
- Security and threat management
- Analytics and multi-function visibility
- A scalable solution that grows with your needs

## SD-WAN

## COMMUNICATIONS TECHNOLOGY BUILT AROUND YOU.

Nothing is cookie cutter about your business. Your communications tools shouldn't be either. Peerless stands apart when it comes to providing companies with the technologies they need to do business smarter. We do it by staying focused on you from end-to-end.

### DISCOVER

We learn about your needs.

### DESIGN

We create the solution that fits.

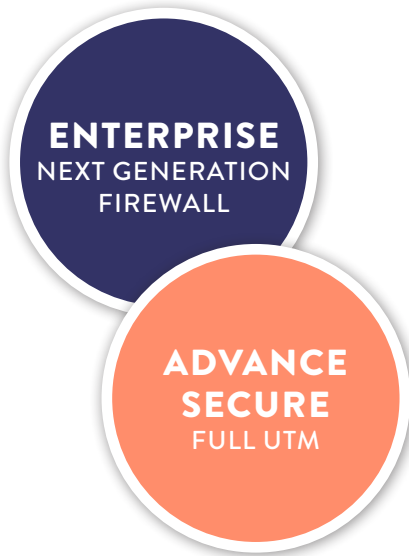

### DELIVER

We're always there when you need us.

You can fully experience the advantages of cloud-delivered applications and resources by ensuring your wide-area network is fine-tuned to the unique needs of your business. Peerless' SD-WAN powered by Cisco Meraki delivers best-in-class security, enhanced application performance and bandwidth optimization. While providing multi-location visibility and analytics through a centralized management user portal.

## SOLUTION DESIGN

### SOFTWARE CONSIDERATIONS

### DESIGN CONSIDERATIONS

Standard Design will be Hub/Spoke Configs

- 7 Hub Templates, including HA and Voice
- 6 Spoke Templates, including HA and Voice
- Detailed config info available via HLD Enhanced Voice Integration via Peerless' Virtual Voice Gateway
