

SIP Trunking Features:

- Static or Registered Trunks (or a combination of both)
- PRI and Analog Delivery (or a combination of both)
- Failsafe Routing to any PSTN Number so you never miss a call
- Load Balancing – Distribute traffic through multiple Ips
- Geo-Redundant Routing
- Long distance your way: Metered (with very competitive rates) or unlimited plans
- Multi-site and remote office connectivity
- Session Border Control (SBC) Redundant Routing (Multiple geographically redundant SBCs with our network ensure that if the primary SBC would fail, your calls would automatically route to/from a secondary SBC.)
- Customer Trunk Redundancy via multiple SIP and PRI trunks
- CNAM Delivery and Storage
- E911
- Local presence anywhere because you choose the telephone numbers
- Real-time visibility of call records and usage via the Peerless Portal
- Certification with most major systems: Cisco, Alcatel-Lucent, Microsoft Teams, Avaya, Asterisk, Mitel/ShoreTel, 3CX, Allworx, and others
- Options to seamlessly integrate with Direct Routing for MS Teams
- No minimum order (All size orders are welcome at Peerless.)
- A dedicated Account Manager ensures your installation meets your specific requirements.

SIP PRI Features:

- 23 SIP Channels
- Edgemarc 4806 with 2 PRI and 6 FXS ports
- Edgemarc installation included
- Standard usage @ .009 per minute
- Unlimited option available
- Disaster Recovery features at no additional charge:
- Failsafe Routing
- Geo-Redundancy
